

Houston Internship Program

TTU College of Architecture

Studio Updates

Student teams presented their schematic proposals on Friday. We invite you to view the work in progress at:

www.arch.ttu.edu/architecture/courses/2005summerI/4601/default.asp

As a reminder, the website takes you to a home page for the studio. If you scroll down, you will find teams with the listing "team folder" under each. You can click on this and it will take you directly to the team website for the corresponding team.

We spent this past week wrapping up schematic design. The students presented their work in progress on Friday and have moved into design development.

On Friday, Prof. Akel Kahera will take over the studio. I will continue to write our newsletter and send this out, but he will teach the studio.

I will also remain as your point of contact should you have any issues. You can always reach me at : 713-806-2548 or 806-470-6149.

Chris Vadala works with Luke Quebe, Tracy Connor, Alix Hill and Joe Ross

A special thanks to Danny Nowak of SHW Group for his lecture last Wednesday.

Danny is lead designer for SHW and shared great insight about the process of design and the issues that lead designers must be aware of throughout the design and construction process.

Additional thanks goes to Chris Vadala and Wally Ford of Haynes Whaley Associates. If you remember, they lectured the students a couple of weeks ago. This past Friday, they provided desk crits for the teams on their structural systems. A great resource that was created through our host firm, HOK.

We appreciate your support.

MaryAlice Torres-MacDonald, Associate Professor

Any questions about the program may be sent to: ma.torres-macdonald@ttu.edu

Vol. I, Issue 8, 27 June 2005

LECTURES

**LECTURE 5:
June 29, 2005
WED. at 6:15pm**

**Morris Architects
Andy MacPhillimy, AIA**

**"Leading the Way: It Isn't
Just a One Man Show"**

Lectures are held at the offices of
HOK, Inc.
2800 Post Oak Blvd.

For More Info About This Firm:

One of the great resources we receive by housing our studio in a host firm is the benefit of their contacts for additional assistance.

One goal of the internship studio is to provide the students with resources they wouldn't typically get in the traditional studio environment.

This past week, Chris Vadala and Wally Ford of Haynes Whaley Associates, a well-respected engineering firm in Houston, provided desk crits on structural systems for each team.
