

Houston Internship Program

TTU College of Architecture

FINAL ISSUE

FINAL REVIEW

The Houston Internship Studio came to an end with a final review attended by most of the several reviewers. Three teams of four presented formal proposals to the reviewers. The presentations ran about 45 minutes and were followed by a critique and dialog.

The consensus after the day long review was that the students had produced a tremendous amount of work for a summer studio in addition to their working full time in a local architectural firm.

The reviewers were impressed with the quality and quantity of the work. They especially noted the level of observation and sensitivity to the design issues.

In most cases, this was the first project for these students involving community issues in an actual project setting. The project included a mixed-use development accompanying retail, housing and a community park space.
