

Houston Practicum Program

TTU College of Architecture

Studio Progress

A special thank you to reviewers Bob Eury and Anton Sinkewich of Central Houston, Inc. for the generosity of their time and expertise.

The students shared their work progress through a formal review. The work led to schematic processes and will be further refined in the upcoming weeks. A public link to view student work is being established and will be noted on the following newsletter.

Our afternoon was shared with MC², where we viewed the work of Chung and Chuong Nguyen. The experience was enriched by their ability to beautiful share the story of design as each project unfolded with rich meaning and sensitivity.

Associate Dean Glenn Hill will be teaching the studio for the remainder of the summer, with a joint week during the last week and final review.

Studio Review in the offices of HOK, Inc.
