

**Final Review – Final Drawing List**

*Due Friday, November 30 at 10am.*

**Development of Final Solution(s)**

- **Select from previous work those drawings you feel are critical to conveying your progress and final solution**
- **Must Include:**
  - **Drawings must express the character of the spaces both above and below grade**
    - **Solutions include:**
      - **Plaza/Park entry**
      - **Garage Entry**
      - **Sidewalk Entry**
      - **Inner Building Entry (Existing Lobby Space)**
  - **Perspectives of Station Approaches both above and below grade (include context)**
  - **Wayfinding design solutions which include directional signage both above and below grade if designed**
  - **Plan drawings of site conditions at each point.**
  - **Map drawing identifying stations within downtown context**
  - **Section through above and below grade at typical station**
  - **Perspectives which help to convey design ideas as they would be used after developed**
  - **Drawings must express the character of the spaces both above and below grade**
    - **Solutions include:**
      - **Plaza/Park entry**
      - **Garage Entry**
      - **Sidewalk Entry**
      - **Inner Building Entry (Existing Lobby Space)**
- **From Previous:**
  - **Remember to include in your solution:**
    - **Wayfinding solutions both above and below grade that establish a vocabulary enabling the user to navigate the system easily – Ask yourself “How does wayfinding support the connections between the tunnel system and the street system?” and support your response through your design solution.**
    - **Establish the diagrammatic walk zones within the tunnel system**
    - **Solutions should establish a symbiotic relationship between above and below**

**Submit Power Point Presentation, final drawings to be posted along with final booklet of relevant work in printed format.**
