

task 01: research/reference

study the *01.04 analysis architecture* handout.
from the blog site download examples from the lecture.

task 02: isometric diagrams

1. You should start with analog sketches to explore ideas, but everything presented must be digitally generated.
2. Use only formZ modeling (isometric); print directly from formZ.
3. optional: export Illustrator to print/present.
4. Scale for all diagrams is $1/16'' = 1'$.
5. Format: 8.5 x 11 sheets; keep orientation consistent for all sheets.
6. Each sheet might have more than one isometric.
 - 1 sheet: re-constructed 3D model of the building presented as two opposing isometric views.
 - 1 sheet: place-spaces vs. path-spaces; articulate the entrance; articulate major and minor.
 - 1 sheet: place-spaces vs. transition-spaces; articulate major and minor.
 - 1 sheet: path-spaces vs. transition-spaces; articulate major and minor.

due date: Fri. 01/27/05, 09:00AM (same houses pinned up together on main wall in studio).
